

## **Max processing time or Max Records limit reached**

### **ENVIRONMENT**

First notices on Win XP Pro but may apply to other OS

### **PROBLEM**

When trying to run a report (Crystal) with a large amount of data (>1000000 records) being manipulated in a query, the following message may appear report

### **Max processing time or Max records limit reached**

and the report does not generate.

This is caused by a default settings in Crystal.

### **SOLUTION:**

Run the command regedit

And modify the value for the field MaxNumOfRecords from 20000 to 0

This field can be found in

My Computer\HKEY\_LOCAL\_MACHINE\SOFTWARE\Crystal Decisions\10.2\Report Application Server\InProcServer\ReportDocument
